

EARLY YEARS EDUCATION SESSIONS

We aim to bring learning to life through our wide range of education sessions. Delivered by our dynamic and highly skilled Education Team, we offer a unique learning experience for all ages and abilities.

Our sessions are linked to a range of curriculums and programmes of study, and deliver interactive experiences using resources such as live animals, biofacts (skulls, skins, and stuffed specimens) and multimedia.

To find out more or book a session, please call 0117 4285 441 or email education@bristolzoo.org.uk

Polar experience - (October half-term to Easter)

A polar explorer greets the group and takes them into a research station to escape the roaring winds outside. The subjects we cover include:

- How animals and explorers survive in cold environments
- Features of polar regions, including weather and locations
- The life of an Antarctic penguin through the seasons

African experience - (Easter to October half-term)

The group goes on safari to the African savannah and enters a camouflaged tent through which they hear the calls of the animals outside. The subjects we cover include:

- Features of the African savannah environment, including weather
- How animals are suited to a savannah environment

Minibeasts and me

We look closely at minibeast bodies and investigate whether minibeasts are as different to us as they look. The subjects we cover include:

- How humans are animals too
- The differences and similarities between minibeasts and us
- How minibeasts eat, grow, reproduce, move and use senses

Jungle Boogie

The group enters a rainforest clearing to the sound of the jungle in this special habitat. This highly interactive session also includes movement and song. The subjects we cover include:

- Features of rainforests, including weather
- How animals are suited to their rainforest environment

Session length: 45 minutes
